Atyani ERP — Frontend Developer Guide

> Complete reference for building the Tally-clone ERP frontend. Every sidebar module, sub-module, form field, and API call is documented here. No questions needed.

Base URL: `https://apidevelop.yanibooks.com`
Auth: All requests (except login/register) require header: `Authorization: Bearer <token>`
Token storage: Save `accessToken` and `refreshToken` from login response in localStorage.

Global Conventions

API Response Format

```json
// Success
{ "success": true, "message": "...", "data": { ... }, "timestamp": "..." }

// List (paginated)
{ "success": true, "data": [...], "pagination": { "total": 150, "page": 1, "limit": 20, "total_pages": 8 } }

// Error
{ "success": false, "message": "...", "error_code": "VALIDATION_ERROR", "errors": [...] }
```

Date Format

Always use `YYYY-MM-DD` (e.g., `2026-03-31`).

Pagination

Query params: `?page=1&limit=20`

Auto Token Refresh (HTTP Interceptor — implement once globally)

1. If API returns 401 → call `POST /api/auth/refresh` with `{ "refresh_token": "<stored>" }`
2. Success → update `accessToken` in storage → retry original request
3. Refresh fails → redirect to `/login`

Common Status Badge Colors

| Status | Color |

```
|---|---|
| DRAFT / PENDING | yellow |
| POSTED / ACTIVE / CONFIRMED / COMPLETED | green |
| CANCELLED / REJECTED / OBSOLETE / TERMINATED | red |
| PAID / CLEARED | blue |
| PARTIALLY_PAID / IN_PROGRESS / HALF_DAY | orange |

1. DASHBOARD

Route: `/dashboard`

Page Load — Call these 3 APIs in parallel:
```
GET /api/dashboard/summary
GET /api/dashboard/sales-chart?months=6
GET /api/dashboard/top-customers?limit=5&from_date=<fy_start>&to_date=<fy_end>
```

KPI Cards (from `summary` response)
Card	Field	Click Action
Total Receivables	`financials.total_receivables`	→ Outstanding Receivables report
Total Payables	`financials.total_payables`	→ Outstanding Payables report
Net Position	`financials.net_position`	—
Month Sales	`financials.month_sales`	→ Sales Analysis
Month Purchases	`financials.month_purchases`	→ Purchase Analysis
Low Stock Alerts	`alerts.low_stock_items`	→ Stock Verification
Pending Cheques	`alerts.pending_cheques`	→ Post-Dated Cheques

Sales vs Purchase Chart
Bar/line chart from `sales-chart` response array: `[{ month: "2026-01", sales: 250000, purchases: 180000 }]`

Top Customers Table
From `top-customers` response: Customer Name, Total Sales, Invoice Count.

Recent Invoices Table
From `summary.recent_invoices`: Invoice No, Date, Customer, Amount, Payment Status.

---

2. COMPANY & SYSTEM SETUP

2.1 Company Profile

Route: `/company/profile`

Page Load

```
GET /api/company
```

Show company details in read mode. "Edit" button toggles form.

Edit Company Form

Field	Input	Required	Key	Validation
Company Name	text	Yes	`name`	min 2 chars
Legal Name	text	No	`legal_name`	
GSTIN	text	No	`gstin`	`^[0-9]{2}[A-Z]{5}[0-9]{4}[A-Z][1-9A-Z]Z[0-9A-Z]$`
PAN	text	No	`pan`	`^[A-Z]{5}[0-9]{4}[A-Z]$`
Address	textarea	No	`address`	
City	text	No	`city`	
State	text	No	`state`	
State Code	text	No	`state_code`	2 digits (e.g. 27)
Pincode	text	No	`pincode`	6 digits
Phone	text	No	`phone`	
Email	email	No	`email`	

Save:

```
PUT /api/company/{company_id}
Body: { name, legal_name, gstin, pan, address, city, state, state_code, pincode,
phone, email }
```

Multi-Company Switch

```
GET /api/company/my-companies       → dropdown of accessible companies
POST /api/auth/switch-company       Body: { "company_id": <id> }
```

On switch success: replace stored `accessToken` with new one from response.

Create Additional Company (from dropdown → "+ Add Company")

```
POST /api/company
Body: { name, legal_name, gstin, pan, address, city, state, state_code, pincode,
phone, email }
```

```
This seeds: 24 ledger groups, 12 ledgers, 9 voucher types, 1 financial year, 1 warehouse automatically.

---

### 2.2 Financial Years

**Route:** `/company/financial-years`

#### List
```
GET /api/settings/financial-years
```
Table: Start Date, End Date, Active (badge).

#### Create Form

| Field | Input | Required | Key |
|---|---|---|---|
| Start Date | date | Yes | `start_date` |
| End Date | date | Yes | `end_date` |
| Set as Active | toggle | No | `is_active` |

```
POST /api/settings/financial-years
Body: { "start_date": "2026-04-01", "end_date": "2027-03-31", "is_active": true }
```

2.3 Users & Access

Route: `/company/users`

List
```
GET /api/users
```
Table: Name, Email, Role(s), Status, Actions (Edit, Toggle Status, Reset Password).

Create User Form
```

```
| Field | Input | Required | Key | Notes |
|---|---|---|---|---|
| Full Name | text | Yes | `name` | |
| Email | email | Yes | `email` | must be unique |
| Password | password | Yes | `password` | min 8 chars |
| Phone | text | No | `phone` | |
| Assign Role(s) | multi-select | Yes | `role_ids[]` | load from `GET /api/roles` |

```
POST /api/users
Body: { "name": "Alice", "email": "alice@co.com", "password": "Pass@123", "role_ids":
[2], "phone": "9876543210" }
```

Edit User
```
GET /api/users/{id}           → pre-fill form
PUT /api/users/{id}           Body: { name, phone }
PUT /api/users/{id}/roles     Body: { "role_ids": [1, 2] }
```

Toggle Status
```
POST /api/users/{id}/toggle-status
```

Reset Password (admin)
```
POST /api/users/{id}/reset-password
Body: { "new_password": "NewPass@123" }
```

2.4 Roles & Permissions

Route: `/company/roles`

List
```
GET /api/roles
```
```

```
Table: Role Name, Actions (Edit Permissions, Delete).

#### Permission Matrix (click a role to edit)
```
GET /api/roles/{id}
```
Render checkbox grid:

| Module | Create | Read | Update | Delete |
|---|---|---|---|---|
| accounting | ☐ | ☑ | ☐ | ☐ |
| sales_invoice | ☑ | ☑ | ☑ | ☐ |
| purchase_invoice | ... | | | |

**Available modules:** `accounting`, `sales_invoice`, `purchase_invoice`, `customers`, `vendors`, `inventory`, `payroll`, `reports`, `settings`, `banking`, `manufacturing`, `approvals`

**Save:**
```
PUT /api/roles/{id}/permissions
Body: {
 "permissions": [
   { "module": "sales_invoice", "can_create": true, "can_read": true, "can_update": true, "can_delete": false }
 ]
}
```

#### Create Role
```
POST /api/roles
Body: { "name": "Accountant", "description": "Manages vouchers and ledgers" }
```

#### Delete Role
```
DELETE /api/roles/{id}
```

---
```

2.5 Data Backup

Route: `/company/backup`

List Backups
```
GET /api/backups
```
Table: Filename, Size, Created At, Actions (Download, Delete).

Create Backup
```
POST /api/backups
```
Show spinner. Refresh list on success.

Download
```
GET /api/backups/{filename}/download
```
Trigger browser file download.

Delete
```
DELETE /api/backups/{filename}
```

---

3. ACCOUNTING & FINANCE

3.1 Chart of Accounts — Ledger Groups

Route: `/accounting/ledger-groups`

List (Tree View recommended)
```
GET /api/ledger-groups
```

````
Display as expandable tree. Each node: Name, Nature badge.

**Default groups (seeded, non-deletable):**
Capital Account, Loans (Liability), Current Liabilities, Fixed Assets, Current Assets,
Investments, Income, Expenses (Direct), Expenses (Indirect), Reserves & Surplus,
Sundry Creditors, Duties & Taxes, Provisions, Sundry Debtors, Cash-in-Hand, Bank
Accounts, Loans & Advances (Asset), Deposits (Asset), Stock-in-Hand, Sales Accounts,
Other Income, Purchase Accounts, Direct Expenses, Indirect Expenses.

#### Create Ledger Group Form

| Field | Input | Required | Key |
|---|---|---|---|
| Name | text | Yes | `name` |
| Nature | select | Yes | `nature` — ASSET / LIABILITY / INCOME / EXPENSE |
| Under (Parent) | select | No | `parent_group_id` — dropdown from existing groups |

```
POST /api/ledger-groups
Body: { "name": "Travel Expenses", "nature": "EXPENSE", "parent_group_id": 9 }
```

#### Edit / Delete
```
PUT /api/ledger-groups/{id}
DELETE /api/ledger-groups/{id}
```

---

### 3.2 Chart of Accounts — Ledgers

**Route:** `/accounting/ledgers`

#### List
```
GET /api/ledgers?group_id=&search=
```
Table: Name, Group, Nature, Opening Balance.

#### Create Ledger Form
````

```
| Field | Input | Required | Key | Notes |
|---|---|---|---|---|
| Ledger Name | text | Yes | `name` | |
| Under Group | searchable select | Yes | `ledger_group_id` | from `GET
/api/ledger-groups` |
| Opening Balance | number | No | `opening_balance` | default 0 |
| Balance Type | radio | No | `balance_type` | DR or CR |
| GSTIN | text | No | `gstin` | for party ledgers |
| Phone/Mobile | text | No | `mobile` | |
| Address | textarea | No | `address` | |

```
POST /api/ledgers
Body: { "name": "HDFC Bank", "ledger_group_id": 16, "opening_balance": 100000,
"balance_type": "DR" }
```

Edit / Delete
```
PUT /api/ledgers/{id}
DELETE /api/ledgers/{id}
```

3.3 Voucher Entry

Route: `/accounting/vouchers`

List
```
GET
/api/vouchers?page=1&limit=20&from_date=2025-04-01&to_date=2026-03-31&status=POSTED&vo
ucher_type_id=1
```
On page load also: `GET /api/settings/voucher-types` → populate Type filter.

Table: Voucher No, Date, Type, Narration, Dr Amount, Cr Amount, Status, Actions.

Create Voucher Form

Step 1 — Header
```

```
| Field | Input | Required | Key |
|---|---|---|---|
| Voucher Type | select | Yes | `voucher_type_id` — from `GET
/api/settings/voucher-types` |
| Date | date | Yes | `voucher_date` |
| Reference No | text | No | `reference_number` |
| Narration | textarea | No | `narration` |

**Voucher Types Reference:**
| Name | Use When |
|---|---|
| Payment | Paying someone (Cash/Bank going out) |
| Receipt | Receiving money (Cash/Bank coming in) |
| Journal | Non-cash adjustments, corrections |
| Contra | Transfer between cash/bank accounts |
| Sales | Invoice-backed sales entry |
| Purchase | Invoice-backed purchase entry |
| Credit Note | Sales return |
| Debit Note | Purchase return |
| Stock Journal | Stock adjustments |

**Step 2 — Entries (Double-Entry Lines)**

Each row:
| Field | Input | Required | Key | Notes |
|---|---|---|---|---|
| Ledger | searchable select | Yes | `ledger_id` | search from `GET /api/ledgers` |
| Dr/Cr | radio | Yes | `dr_cr` | DR or CR |
| Amount | number | Yes | `amount` | |
| Cost Centre | select | No | `cost_centre_id` | from `GET /api/cost-centres` |

**Balance Check:** Show live `Total DR = ₹X` vs `Total CR = ₹Y`. Disable "Save" button
if DR ≠ CR.
Minimum: 2 rows required.

**Save as Draft:**
```
POST /api/vouchers
Body: {
 "voucher_type_id": 1,
 "voucher_date": "2026-03-15",
```
```

```
 "narration": "Office rent payment",
 "entries": [
   { "ledger_id": 5, "dr_cr": "DR", "amount": 25000 },
   { "ledger_id": 10, "dr_cr": "CR", "amount": 25000 }
 ]
}
```

Post Voucher (finalize — creates accounting effect):
```
POST /api/vouchers/{id}/post
```

Cancel Voucher:
```
POST /api/vouchers/{id}/cancel
```

3.4 Bank Reconciliation

Route: `/accounting/bank-reconciliation`

List
```
GET /api/bank-reconciliations?bank_account_id=1&status=PENDING&limit=10
```
> First load: `GET /api/ledgers` filtered to Bank Accounts group → populate bank selector.

Table: Bank Account, Statement Date, Statement Balance, Status, Actions.

Create Reconciliation Form

Field	Input	Required	Key
Bank Account	select	Yes	`bank_account_id` — ledgers under "Bank Accounts" group
Statement Date	date	Yes	`statement_date`
Closing Balance (as per statement)	number	Yes	`statement_balance`

Add Bank Statement Transactions (rows):

Field	Input	Key
Transaction Date	date	`transaction_date`
Cheque/Ref No	text	`cheque_no`
Description	text	`description`
Debit (money in bank)	number	`debit_amount`
Credit (money out of bank)	number	`credit_amount`

```
POST /api/bank-reconciliations
Body: {
 "bank_account_id": 1,
 "statement_date": "2026-03-31",
 "statement_balance": 150000,
 "transactions": [
   { "transaction_date": "2026-03-30", "description": "Customer payment",
"debit_amount": 50000, "credit_amount": 0 }
 ]
}
```

Matching Screen (open a reconciliation → `/bank-reconciliation/{id}`)

```
GET /api/bank-reconciliations/{id}/unmatched   → bank entries not yet matched to ERP
vouchers
GET /api/bank-reconciliations/{id}/matched     → already matched pairs
GET /api/bank-reconciliations/{id}             → reconciliation summary
```

Two-panel view: Bank entries (left) | ERP Vouchers (right). User selects pairs and clicks "Match".

Match:

```
POST /api/bank-reconciliations/match-transaction
Body: { "reconciliation_id": 1, "bank_transaction_id": 5, "voucher_id": 100 }
```

Unmatch:

```
```

```
POST /api/bank-reconciliations/unmatch-transaction
Body: { "reconciliation_id": 1, "bank_transaction_id": 5 }
```

Finalize (lock reconciliation):
```
POST /api/bank-reconciliations/{id}/finalize
```

Summary for an account:
```
GET /api/bank-reconciliations/account/{bank_account_id}/summary
```

3.5 Interest Calculation

Route: `/accounting/interest`

Two tabs: **On Receivables** | **On Payables**

Receivables Filter

Field	Input	Key	Default
Annual Rate %	number	`rate`	18
As of Date	date	`as_of_date`	today
From Date	date	`from_date`	optional
To Date	date	`to_date`	optional
Customer	searchable select	`customer_id`	optional

```
GET /api/interest/receivables?rate=18&as_of_date=2026-03-31&customer_id=1
```

Response display:
- Summary card: Total Outstanding, Total Interest, Total Due
- Detail table: Invoice No, Customer, Invoice Date, Days Outstanding, Outstanding Amt, Interest Amt, Total Due

Payables Filter (same, but for vendors)

```
GET /api/interest/payables?rate=18&as_of_date=2026-03-31&vendor_id=1
```

3.6 Cost Centres

Route: `/accounting/cost-centres`

Two sections (tabs): **Categories** | **Cost Centres**

List Categories
```
GET /api/cost-centres/categories
```

Create Category Form

Field	Input	Required	Key
Name	text	Yes	`name`
Description	textarea	No	`description`

```
POST /api/cost-centres/categories
Body: { "name": "Operations", "description": "..." }
```

Edit/Delete Category
```
PUT /api/cost-centres/categories/{id}
DELETE /api/cost-centres/categories/{id}
```

List Cost Centres
```
GET /api/cost-centres
```

Create Cost Centre Form

Field	Input	Required	Key
Name	text	Yes	`name`
Category	select	Yes	`category_id` — from `GET /api/cost-centres/categories`
Description	textarea	No	`description`
Parent Cost Centre	select	No	`parent_id`

```
POST /api/cost-centres
Body: { "name": "Mumbai Branch", "category_id": 1 }
```

Edit/Delete

```
PUT /api/cost-centres/{id}
DELETE /api/cost-centres/{id}
```

3.7 Budgets

Route: `/accounting/budgets`

List

```
GET /api/budgets?status=ACTIVE
```

Table: Name, Period Type, From-To, Status, Actions (View, Edit, Variance, Delete).

Create Budget Form

Field	Input	Required	Key
Budget Name	text	Yes	`name`
Period Type	select	Yes	`period_type` — ANNUAL / QUARTERLY / MONTHLY
From Date	date	Yes	`from_date`
To Date	date	Yes	`to_date`
Notes	textarea	No	`notes`

Budget Lines (repeating rows):

Field	Input	Required	Key
Ledger	searchable select	Yes	`ledger_id` — from `GET /api/ledgers`
Period Label	text	Yes	`period_label` e.g. "Apr-2025"
Budgeted Amount	number	Yes	`amount`

```
POST /api/budgets
Body: {
 "name": "FY 2025-26 Annual Budget",
 "period_type": "ANNUAL",
 "from_date": "2025-04-01",
 "to_date": "2026-03-31",
 "items": [
   { "ledger_id": 5, "period_label": "FY2025-26", "amount": 500000 }
 ]
}
```

Variance Report (Budget vs Actual)

```
GET /api/budgets/{id}/variance
```

Table: Ledger, Budgeted Amount, Actual (from vouchers), Variance, Variance %.

Edit / Delete

```
PUT /api/budgets/{id}
DELETE /api/budgets/{id}
```

---

4. INVOICING & BILLING

4.1 Sales Invoices

Route: `/invoicing/sales`

List

```
GET
/api/sales-invoices?page=1&limit=20&status=POSTED&from_date=2025-04-01&to_date=2026-03
-31&customer_id=&payment_status=
```
Filters: Status, Payment Status, Date Range, Customer.
Table: Invoice No, Date, Customer, Net Total, Status, Payment Status, Actions.

Create Sales Invoice Form

Pre-load data (on form open):
```
GET /api/customers?limit=100          → customer dropdown
GET /api/settings/warehouses          → warehouse options
GET /api/items?limit=100              → items (lazy search recommended)
```

Header Section:

Field	Input	Required	Key	Notes
Customer	searchable select	Yes	`customer_id`	type-ahead search
Invoice Date	date	Yes	`invoice_date`	default: today
Due Date	date	No	`due_date`	default: invoice_date + 30 days
Invoice Type	select	No	`invoice_type`	B2B (default), B2C, EXPORT, SEZ
Place of Supply	select	Yes	`place_of_supply`	2-digit state code
Reference No	text	No	`reference_number`	

Place of Supply — India State Codes:
`01=J&K, 02=HP, 03=PB, 04=CH, 05=UK, 06=HR, 07=DL, 08=RJ, 09=UP, 10=BR, 11=SK, 12=AR, 13=NL, 14=MN, 15=MZ, 16=TR, 17=ML, 18=AS, 19=WB, 20=JH, 21=OR, 22=CG, 23=MP, 24=GJ, 27=MH, 28=AP, 29=KA, 30=GA, 32=KL, 33=TN, 36=TS`

Item Lines Table (add rows dynamically):

Field	Input	Required	Key	Notes
Item	searchable select	Yes	`item_id`	auto-fills rate, gst_rate, hsn_code
Warehouse	select	Yes	`warehouse_id`	
Qty	number	Yes	`qty`	
Rate	number	Yes	`rate`	editable, pre-filled from item
Discount %	number	No	`discount_pct`	default 0

HSN Code	text	No	`hsn_code`	auto-filled from item
GST Rate %	select	Yes	`gst_rate`	0 / 5 / 12 / 18 / 28
Taxable Amt	computed	—	`taxable_amount`	`qty × rate × (1 - discount/100)`
CGST / SGST or IGST	computed	—	—	see GST logic below
Total	computed	—	`total_amount`	`taxable + tax`

GST Auto-Calculation Logic:

```
If place_of_supply === company.state_code:
 // Intra-state
 cgst_rate = gst_rate / 2
 sgst_rate = gst_rate / 2
 igst_rate = 0
Else:
 // Inter-state
 cgst_rate = 0
 sgst_rate = 0
 igst_rate = gst_rate
```

> Get `company.state_code` from the active company stored in localStorage/context.

Footer (auto-computed):

Gross Total → (−) Discount → Taxable Amount → (+) CGST → (+) SGST → (+) IGST → (+) Cess → (±) Round Off → **Net Total**

Save as DRAFT:

```
POST /api/sales-invoices
Body: {
 "customer_id": 1,
 "invoice_date": "2026-03-15",
 "due_date": "2026-04-15",
 "invoice_type": "B2B",
 "place_of_supply": "27",
 "items": [
   {
     "item_id": 1,
     "warehouse_id": 1,
     "qty": 2,
     "rate": 55000,
     "discount_pct": 0,
     "gst_rate": 18,
```

```
    "hsn_code": "8471"
   }
 ]
}
```

Action Buttons (status-based):

Button	Condition	API
Post Invoice	status=DRAFT	`POST /api/sales-invoices/{id}/post`
Collect Payment	status=POSTED, payment_status≠PAID	`POST /api/sales-invoices/{id}/payment`
Submit for Approval	status=DRAFT	`POST /api/approvals` + entity
Cancel Invoice	status=DRAFT or POSTED	`POST /api/sales-invoices/{id}/cancel`
Print	any	frontend PDF generation

Collect Payment Form:

Field	Input	Required	Key
Amount	number	Yes	`amount`
Payment Date	date	Yes	`payment_date`
Payment Mode	select	Yes	`payment_mode` — CASH / BANK / CHEQUE / UPI / NEFT / RTGS
Reference No	text	No	`reference`

```
POST /api/sales-invoices/{id}/payment
Body: { "amount": 129800, "payment_date": "2026-03-20", "payment_mode": "BANK", "reference": "NEFT/001" }
```

4.2 Purchase Invoices

Route: `/invoicing/purchases`

List

```
GET /api/purchase-invoices?page=1&limit=20&status=&vendor_id=&from_date=&to_date=
```

Create Purchase Invoice Form

Header:

Field	Input	Required	Key
Vendor	searchable select	Yes	`vendor_id`
Vendor Invoice No	text	No	`invoice_number`
Invoice Date	date	Yes	`invoice_date`
Due Date	date	No	`due_date`
Place of Supply	select	Yes	`place_of_supply`

Item Lines:

Same as Sales Invoice PLUS:

Field	Input	Key	Notes
ITC Eligibility	select	`itc_eligibility`	ELIGIBLE / INELIGIBLE / PARTIALLY_ELIGIBLE

Save:

```
POST /api/purchase-invoices
Body: { "vendor_id": 1, "invoice_date": "...", "place_of_supply": "27", "items": [...] }
```

Action Buttons:

Button	Condition	API
Post Invoice	DRAFT	`POST /api/purchase-invoices/{id}/post` — receives stock
Record Payment	POSTED	`POST /api/purchase-invoices/{id}/payment`
Cancel	DRAFT/POSTED	`POST /api/purchase-invoices/{id}/cancel`

4.3 Credit Notes (Sales Returns)

Route: `/invoicing/credit-notes`

List

```
GET /api/credit-notes?page=1&limit=20
```

```

#### Create Credit Note Form

| Field | Input | Required | Key |
|---|---|---|---|
| Customer | searchable select | Yes | `customer_id` |
| Credit Note Date | date | Yes | `credit_date` |
| Against Invoice (optional) | select | No | `original_invoice_id` — from `GET /api/sales-invoices?customer_id=X` |
| Place of Supply | select | Yes | `place_of_supply` |

**Item Lines:** Same as Sales Invoice.

```
POST /api/credit-notes
Body: {
 "customer_id": 1,
 "credit_date": "2026-03-20",
 "original_invoice_id": 5,
 "place_of_supply": "27",
 "items": [{ "item_id": 1, "quantity": 2, "rate": 55000, "gst_rate": 18, "hsn_code": "8471" }]
}
```

**Action Buttons:**

| Button | Condition | API |
|---|---|---|
| Post | DRAFT | `POST /api/credit-notes/{id}/post` — restores stock (IN) |
| Cancel | DRAFT/POSTED | `POST /api/credit-notes/{id}/cancel` |

---

### 4.4 Debit Notes (Purchase Returns)

**Route:** `/invoicing/debit-notes`

#### Create Debit Note Form

| Field | Input | Required | Key |
|---|---|---|---|
```

Vendor	searchable select	Yes	`vendor_id`
Debit Note Date	date	Yes	`debit_date`
Against Invoice	select	No	`original_invoice_id`
Place of Supply	select	Yes	`place_of_supply`

Item Lines: Same as Purchase Invoice.

```
POST /api/debit-notes
Body: { "vendor_id": 1, "debit_date": "...", "original_invoice_id": 3,
"place_of_supply": "27", "items": [...] }
```

Action Buttons:
Button	Condition	API
Post	DRAFT	`POST /api/debit-notes/{id}/post` — reduces stock (OUT)
Cancel	DRAFT/POSTED	`POST /api/debit-notes/{id}/cancel`

4.5 Proforma Invoices

Route: `/invoicing/proforma`

Create Form
Same fields as Sales Invoice, plus:
Field	Input	Key
Valid Until	date	`valid_until`
Notes	textarea	`notes`

```
POST /api/proforma-invoices
Body: { "customer_id": 1, "proforma_date": "2026-03-01", "valid_until": "2026-03-31",
"place_of_supply": "27", "items": [...] }
```

Status Lifecycle Buttons:
Current Status	Button	API
DRAFT	Send	`POST /api/proforma-invoices/{id}/send`

```
| SENT | Accept | `POST /api/proforma-invoices/{id}/accept` |
| SENT | Reject | `POST /api/proforma-invoices/{id}/reject` + `{ "reason": "..." }` |
| ACCEPTED | Convert to Invoice | `POST /api/proforma-invoices/{id}/convert` |

---

### 4.6 Sales Orders

**Route:** `/invoicing/sales-orders`

#### Create Form

| Field | Input | Required | Key |
|---|---|---|---|
| Customer | searchable select | Yes | `customer_id` |
| Order Date | date | Yes | `order_date` |
| Expected Delivery | date | No | `expected_delivery` |

**Item Lines:**
| Field | Input | Key |
|---|---|---|
| Item | searchable select | `item_id` |
| Qty | number | `qty` |
| Rate | number | `rate` |

```
POST /api/sales-orders
Body: { "customer_id": 1, "order_date": "2026-03-15", "items": [{ "item_id": 1, "qty": 5, "rate": 55000 }] }
```

Cancel:
```
POST /api/sales-orders/{id}/cancel
```

4.7 Purchase Orders

Route: `/invoicing/purchase-orders`
```

Create Form

Field	Input	Required	Key
Vendor	searchable select	Yes	`vendor_id`
PO Number	text	Yes	`po_number`
Order Date	date	Yes	`order_date`
Expected Delivery	date	No	`expected_delivery`
Notes	textarea	No	`notes`

Item Lines:

Field	Input	Key
Item	searchable select	`item_id`
Qty	number	`quantity`
Rate	number	`rate`
Amount	computed	`qty × rate`

```
POST /api/purchase-orders
Body: { "vendor_id": 1, "po_number": "PO-2026-001", "order_date": "2026-03-15",
"items": [...], "total_amount": 10000 }
```

Status Buttons:

Button	Condition	API
Confirm	DRAFT	`POST /api/purchase-orders/{id}/confirm`
Cancel	DRAFT/CONFIRMED	`POST /api/purchase-orders/{id}/cancel`

---

5. INVENTORY MANAGEMENT

5.1 Stock Items

Route: `/inventory/items`

List
```
```

```
GET /api/items?page=1&limit=20&search=&category=
```

Table: SKU, Name, Unit, Sale Price, Purchase Price, Current Stock, Reorder Level.

Create Item Form

Field	Input	Required	Key	Notes
Item Name	text	Yes	`name`	
SKU / Code	text	No	`sku`	
Description	textarea	No	`description`	
Unit	select	Yes	`unit`	PCS / KG / LTR / MTR / BOX / SET
Category	text	No	`category`	
Sale Price	number	Yes	`sale_price`	
Purchase Price	number	No	`purchase_price`	
GST Rate %	select	Yes	`gst_rate`	0 / 5 / 12 / 18 / 28
HSN/SAC Code	text	No	`hsn_code`	lookup: `GET /api/hsn-sac?search=X`
Opening Stock	number	No	`opening_stock`	default 0
Reorder Level	number	No	`reorder_level`	alert threshold
Track Inventory	toggle	No	`track_inventory`	default true

```
POST /api/items
Body: { "name": "Laptop HP 15", "sku": "HP-001", "unit": "PCS", "sale_price": 55000,
"purchase_price": 45000, "gst_rate": 18, "hsn_code": "8471", "opening_stock": 10,
"reorder_level": 2 }
```

View Item Stock

```
GET /api/items/{id}/stock
```

Shows current stock per warehouse.

Edit / Delete

```
PUT /api/items/{id}
DELETE /api/items/{id}
```

5.2 Stock Summary

Route: `/inventory/stock-summary`

```
GET /api/inventory/stock-summary?warehouse_id=1
```
or
```
GET /api/reports/stock-summary?warehouse_id=1&category=Electronics
```

Filters: Warehouse (select from `GET /api/settings/warehouses`), Category, Item.
Table: Item, Unit, Opening, IN Qty, OUT Qty, Closing, Value.

5.3 Stock Transfer

Route: `/inventory/transfer`

Create Transfer Form

Field	Input	Required	Key
From Warehouse	select	Yes	`from_warehouse_id` — from `GET /api/settings/warehouses`
To Warehouse	select	Yes	`to_warehouse_id`
Transfer Date	date	Yes	`transfer_date`
Item	searchable select	Yes	`item_id`
Quantity	number	Yes	`qty`
Remarks	text	No	`remarks`

```
POST /api/inventory/transfer-stock
Body: { "item_id": 1, "from_warehouse_id": 1, "to_warehouse_id": 2, "qty": 20,
"transfer_date": "2026-03-20" }
```

5.4 Wastage

Route: `/inventory/wastage`

List

```
GET /api/wastage?page=1&limit=20&status=PENDING
```

Table: Date, Item, Warehouse, Qty, Reason, Status, Actions.

Create Form

Field	Input	Required	Key
Item	searchable select	Yes	`item_id`
Warehouse	select	Yes	`warehouse_id`
Quantity	number	Yes	`quantity`
Wastage Date	date	Yes	`wastage_date`
Reason	text	Yes	`reason`
Remarks	textarea	No	`remarks`

```
POST /api/wastage
Body: { "item_id": 1, "warehouse_id": 1, "quantity": 5, "wastage_date": "2026-03-01",
"reason": "Damaged" }
```

Manager Action Buttons:

Button	API	Body
Approve	`POST /api/wastage/{id}/approve`	`{ "remarks": "Verified" }` → creates stock OUT
Reject	`POST /api/wastage/{id}/reject`	`{ "remarks": "Not proven" }`

5.5 Stock Verification (Physical Count)

Route: `/inventory/stock-verification`

List

```
GET /api/stock-verification
```

```
Table: Date, Warehouse, Status (OPEN / SUBMITTED / POSTED), Actions.

#### Create Verification Form

| Field | Input | Required | Key |
|---|---|---|---|
| Warehouse | select | Yes | `warehouse_id` |
| Verification Date | date | Yes | `verification_date` |
| Notes | textarea | No | `notes` |

```
POST /api/stock-verification
Body: { "warehouse_id": 1, "verification_date": "2026-03-31", "notes": "Year-end
count" }
```
> Backend auto-fills `system_qty` for every item in the warehouse.

#### Verification Detail — Enter Physical Counts
```
GET /api/stock-verification/{id}
```
Show table with `system_qty` pre-filled. User enters `physical_qty` per row.

```
POST /api/stock-verification/{id}/count
Body: { "counts": [{ "item_id": 1, "physical_qty": 48 }, { "item_id": 2,
"physical_qty": 95 }] }
```

View Variance Report:
```
GET /api/stock-verification/{id}/variance
```
Table: Item, System Qty, Physical Qty, Variance (+ or −).

Post Adjustments:
```
POST /api/stock-verification/{id}/post
```
> Creates StockLedger IN/OUT entries to reconcile differences.
```

5.6 HSN / SAC Codes

Route: `/inventory/hsn-sac`

List
```
GET /api/hsn-sac?type=HSN&search=8471&page=1&limit=50
```
Filters: Type (HSN/SAC), Search Code or Description.
Table: Code, Type, Description, GST Rate %, Cess %.

Create Form

Field	Input	Required	Key
Code	text	Yes	`code`
Type	select	Yes	`type` — HSN or SAC
Description	textarea	No	`description`
GST Rate %	number	No	`gst_rate`
Cess Rate %	number	No	`cess_rate`

```
POST /api/hsn-sac
Body: { "code": "8471", "type": "HSN", "description": "Computers", "gst_rate": 18,
"cess_rate": 0 }
```

Edit
```
PUT /api/hsn-sac/{id}
Body: { "gst_rate": 12 }
```

---

6. MANUFACTURING

6.1 Bill of Materials (BOM)

Route: `/manufacturing/bom`

List

```
GET /api/manufacturing/bom?status=ACTIVE
```

Table: Finished Item, Version, Qty per Batch, Status, Actions.

Create BOM Form

Field	Input	Required	Key
Finished Item	searchable select	Yes	`finished_item_id` — from `GET /api/items`
Version	text	Yes	`version` e.g. "1.0"
Qty Produced per batch	number	Yes	`qty_produced`
Status	select	No	`status` — DRAFT / ACTIVE / OBSOLETE

Raw Materials (repeating rows):

Field	Input	Required	Key	Notes
Raw Material Item	searchable select	Yes	`item_id`	
Qty Required	number	Yes	`qty`	per `qty_produced` units
Wastage %	number	No	`wastage_pct`	e.g. 2 for 2%
Sub-BOM	select	No	`sub_bom_id`	for multi-level BOM

```
POST /api/manufacturing/bom
Body: {
 "finished_item_id": 1,
 "version": "1.0",
 "qty_produced": 1,
 "items": [
   { "item_id": 2, "qty": 5, "wastage_pct": 2 },
   { "item_id": 3, "qty": 2, "wastage_pct": 0 }
 ]
}
```

BOM Explosion (Material Planning Tool)

Widget on BOM detail page: enter qty to produce → show material requirements.

```
GET /api/manufacturing/bom/{id}/explode?qty=100
```

Table: Raw Material, Required Qty (with wastage), Current Stock, Shortage.

6.2 Production Orders

Route: `/manufacturing/production-orders`

List

```
GET /api/manufacturing/production-orders?status=DRAFT
```

Create Form

Field	Input	Required	Key
BOM	select	Yes	`bom_id` — from `GET /api/manufacturing/bom?status=ACTIVE`
Finished Item	auto-filled	Yes	`finished_item_id`
Qty to Produce	number	Yes	`qty_to_produce`
Output Warehouse	select	Yes	`warehouse_id`
Planned Start	date	No	`planned_start`
Planned End	date	No	`planned_end`
Notes	textarea	No	`notes`

```
POST /api/manufacturing/production-orders
Body: { "bom_id": 1, "finished_item_id": 1, "qty_to_produce": 100, "warehouse_id": 1,
"planned_start": "2026-04-01", "planned_end": "2026-04-10" }
```

Status Buttons:

Button	Condition	API	Effect
Release	DRAFT	`POST /api/manufacturing/production-orders/{id}/release`	Consumes raw materials (stock OUT)

| Complete | RELEASED/IN_PROGRESS | `POST /api/manufacturing/production-orders/{id}/complete` + `{ "qty_produced": 98 }` | Adds finished goods (stock IN) |

6.3 Job Work

Route: `/manufacturing/job-work`

Create Form

Field	Input	Required	Key	Notes
Type	radio	Yes	`type`	OUT = send to vendor, IN = receive back
Vendor	searchable select	Yes	`vendor_id`	
Item	searchable select	Yes	`item_id`	
Qty	number	Yes	`qty_sent`	
Sent Date	date	Yes	`sent_date`	
Expected Return	date	No	`expected_return`	
Job Charges	number	No	`job_charges`	
Notes	textarea	No	`notes`	

```
POST /api/manufacturing/job-work
Body: { "type": "OUT", "vendor_id": 1, "item_id": 1, "qty_sent": 100, "sent_date": "2026-03-01", "job_charges": 5000 }
```

---

7. GST & TAXATION

7.1 GST Summary Report

Route: `/gst/summary`

Filters: From Date, To Date.
```
GET /api/reports/gst-summary?from_date=2025-04-01&to_date=2026-03-31
```

```
Display: GSTR-1 outward (sales) by HSN code, GSTR-2 inward (purchases), CGST/SGST/IGST column totals.

---

### 7.2 Reverse Charge Mechanism (RCM)

**Route:** `/gst/rcm`

Two tabs: **RCM Transactions** | **RCM Liability**

#### RCM Transactions (Unregistered Vendor Purchases)
```
GET /api/rcm/transactions?from_date=2025-04-01&to_date=2026-03-31&vendor_id=1
```
Table: Date, Vendor, Invoice No, Taxable Amount, IGST/CGST/SGST payable under RCM.

#### RCM Liability Summary
```
GET /api/rcm/liability?from_date=2025-04-01&to_date=2026-03-31
```
Summary card: Total IGST Payable, Total CGST Payable, Total SGST Payable, ITC Eligibility note.

---

## 8. PAYROLL & HR

---

### 8.1 Employees

**Route:** `/payroll/employees`

#### List
```
GET /api/payroll/employees?status=ACTIVE&department=Engineering&page=1&limit=20
```
Table: Code, Name, Department, Designation, DOJ, Salary, Status, Actions.

#### Create Employee Form
```

Field	Input	Required	Key
Employee Code	text	Yes	`employee_code`
Full Name	text	Yes	`name`
Email	email	No	`email`
Phone	text	No	`phone`
Department	text	No	`department`
Designation	text	No	`designation`
Date of Joining	date	Yes	`date_of_joining`
Basic Salary	number	Yes	`basic_salary`
PAN	text	No	`pan`
Aadhaar	text	No	`aadhaar`
PF Account No	text	No	`pf_account`
ESI No	text	No	`esi_number`
Bank Account No	text	No	`bank_account`
Bank IFSC	text	No	`bank_ifsc`
Bank Name	text	No	`bank_name`
Status	select	No	`status` — ACTIVE / INACTIVE / TERMINATED

```
POST /api/payroll/employees
Body: { "employee_code": "EMP001", "name": "Rahul Sharma", "date_of_joining":
"2025-01-01", "basic_salary": 50000, "department": "Engineering", ... }
```

8.2 Attendance

Route: `/payroll/attendance`

Monthly Calendar View

```
GET /api/payroll/attendance/{employee_id}?month=2026-03
```

Show each day's status per employee: PRESENT (green), ABSENT (red), HALF_DAY (orange), LEAVE (blue), HOLIDAY (gray), WEEK_OFF (gray).

Mark Attendance Form

| Field | Input | Required | Key | Values |

```
|---|---|---|---|---|
| Employee | select | Yes | `employee_id` | |
| Date | date | Yes | `attendance_date` | |
| Status | select | Yes | `status` | PRESENT / ABSENT / HALF_DAY / LEAVE / HOLIDAY / WEEK_OFF |
| Check In | time | No | `check_in` | |
| Check Out | time | No | `check_out` | |

```
POST /api/payroll/attendance
Body: { "employee_id": 1, "attendance_date": "2026-03-15", "status": "PRESENT", "check_in": "09:00", "check_out": "18:00" }
```

Bulk Attendance (for a whole day)
```
POST /api/payroll/attendance/bulk
Body: {
 "attendance_date": "2026-03-15",
 "records": [
   { "employee_id": 1, "status": "PRESENT" },
   { "employee_id": 2, "status": "ABSENT" }
 ]
}
```

8.3 Salary Structure

Route: `/payroll/salary-structure`

View Employee's Structure
```
GET /api/payroll/employees/{id}/salary-structure
```

Set / Edit Salary Structure Form

```
| Field | Input | Required | Key |
|---|---|---|---|
| Employee | select (pre-selected from list) | Yes | `employee_id` |
```
```

```
| Basic | number | Yes | `basic` |
| HRA | number | No | `hra` |
| Special Allowance | number | No | `special_allowance` |
| Other Allowance | number | No | `other_allowance` |
| Medical Allowance | number | No | `medical_allowance` |
| Transport Allowance | number | No | `transport_allowance` |

**Auto-Calculated (show as read-only below):**
| Deduction | Formula |
|---|---|
| PF (Employee) | 12% of basic, capped at ₹1,800 (if gross > ₹15,000) |
| PF (Employer) | Same as employee PF |
| ESI (Employee) | 0.75% of gross (only if gross ≤ ₹21,000) |
| ESI (Employer) | 3.25% of gross |
| Professional Tax | ₹200 if gross > ₹15k / ₹150 if > ₹10k / ₹75 if > ₹7.5k |
| Net Salary | Total Earnings - Total Deductions |

```
POST /api/payroll/salary-structure
Body: { "employee_id": 1, "basic": 50000, "hra": 20000, "special_allowance": 10000,
"other_allowance": 5000 }
```

8.4 Payslip Generation

Route: `/payroll/payslips`

List
```
GET /api/payroll/payslips?month=2026-03&status=DRAFT&employee_id=
```
Table: Employee, Month, Gross, Deductions, Net Pay, Status, Actions.

Generate Payslip Form

Field	Input	Required	Key
Employee	select	Yes	`employee_id`
Salary Month	month-picker	Yes	`salary_month` — format YYYY-MM
```

```
POST /api/payroll/payslips/generate
Body: { "employee_id": 1, "salary_month": "2026-03" }
```
> Backend pro-rates: `net_pay = net_salary × (present_days / working_days)`

Status Buttons:

Button	Condition	API
Approve	DRAFT	`POST /api/payroll/payslips/{id}/approve`
Mark Paid	APPROVED	`POST /api/payroll/payslips/{id}/mark-paid`

Payslip Print View

Show: Employee details, month, earnings table, deductions table, net pay, employer contributions, signature line.

---

9. BANKING & PAYMENTS

9.1 Post-Dated Cheques

Route: `/banking/cheques`

List

```
GET /api/cheques?status=PENDING&type=RECEIVED&page=1
```

Due Soon Alert Banner:

```
GET /api/cheques/due-soon?days=7
```

Show yellow warning banner with count of cheques due in next 7 days.

Filters: Type (RECEIVED/ISSUED), Status, Party, Date range.
Table: Cheque No, Bank, Party, Amount, Cheque Date, Status, Actions.

Create Cheque Form

Field	Input	Required	Key	Notes
Type	radio	Yes	`type`	RECEIVED (from customer) / ISSUED (to vendor)
Party Type	select	Yes	`party_type`	CUSTOMER / VENDOR
Party	searchable select	Yes	`party_id`	load customers or vendors based on party_type
Cheque Number	text	Yes	`cheque_number`	
Bank Name	text	No	`bank_name`	
Cheque Date	date	Yes	`cheque_date`	future date = post-dated
Amount	number	Yes	`amount`	
Remarks	text	No	`remarks`	

```
POST /api/cheques
Body: { "type": "RECEIVED", "party_type": "CUSTOMER", "party_id": 1, "cheque_number": "CHQ001", "cheque_date": "2026-04-15", "amount": 50000 }
```

Action Buttons:

Button	Condition	API	Extra Body
Clear	status=PENDING	`POST /api/cheques/{id}/clear`	`{ "cleared_date": "2026-04-15", "remarks": "Deposited" }`
Bounce	status=PENDING	`POST /api/cheques/{id}/bounce`	`{ "reason": "Insufficient funds", "charge": 500 }`
Cancel	status=PENDING	`POST /api/cheques/{id}/cancel`	—

---

10. REPORTS & MIS

Route prefix: `/reports/`

> All reports share a **Filter Bar** component at the top and a **Download/Print** button.

10.1 Trial Balance

Route: `/reports/trial-balance`

```
```

```
GET /api/reports/trial-balance?from_date=2025-04-01&to_date=2026-03-31
```

Filters: From Date, To Date.
Display: Ledger Group/Ledger tree, Opening DR, Opening CR, Transactions DR, Transactions CR, Closing DR, Closing CR.

10.2 Profit & Loss Account
Route: `/reports/profit-loss`
```
GET /api/reports/profit-loss?from_date=2025-04-01&to_date=2026-03-31
```
Filters: From Date, To Date.
Display: Income section | Expenses section | Net Profit/Loss at bottom.

10.3 Balance Sheet
Route: `/reports/balance-sheet`
```
GET /api/reports/balance-sheet?as_on_date=2026-03-31
```
Filters: As On Date.
Display: Assets (left/top) | Liabilities+Capital (right/bottom). Must balance.

10.4 Ledger Account Report
Route: `/reports/ledger`
```
GET /api/reports/ledger/{ledger_id}?from_date=2025-04-01&to_date=2026-03-31
```
Filters: Ledger (searchable select from `GET /api/ledgers`), From Date, To Date.
Display: Date, Voucher No, Narration, DR Amount, CR Amount, Running Balance.

10.5 Outstanding Receivables
Route: `/reports/outstanding-receivables`
```
GET /api/reports/outstanding-receivables?as_on_date=2026-03-31&customer_id=1
```

```
Filters: As On Date, Customer (optional).
Table: Customer, Invoice No, Invoice Date, Due Date, Invoice Amt, Paid, Outstanding, Overdue Days.

---

### 10.6 Outstanding Payables
**Route:** `/reports/outstanding-payables`
```
GET /api/reports/outstanding-payables?as_on_date=2026-03-31&vendor_id=1
```
Filters: As On Date, Vendor (optional).

---

### 10.7 Stock Summary Report
**Route:** `/reports/stock-summary`
```
GET /api/reports/stock-summary?warehouse_id=1
```
Filters: Warehouse (optional).
Table: Item, Unit, Opening Qty, IN, OUT, Closing Qty, Value.

---

### 10.8 Sales Analysis
**Route:** `/reports/sales-analysis`
```
GET /api/reports/sales-analysis?from_date=2025-04-01&to_date=2026-03-31&group_by=month
```
`group_by`: `month` or `customer`
Display: Bar chart + summary table.

---

### 10.9 Purchase Analysis
**Route:** `/reports/purchase-analysis`
```
GET
/api/reports/purchase-analysis?from_date=2025-04-01&to_date=2026-03-31&group_by=month
```
```

`group_by`: `month` or `vendor`

10.10 GST Summary
Route: `/reports/gst-summary`
```
GET /api/reports/gst-summary?from_date=2025-04-01&to_date=2026-03-31
```
Shows: GSTR-1 summary (sales by GST rate), GSTR-2 summary (purchases).

10.11 Cash Flow Report
Route: `/reports/cash-flow`
```
GET /api/reports/cash-flow?from_date=2025-04-01&to_date=2026-03-31
```

10.12 Fund Flow Report
Route: `/reports/fund-flow`
```
GET /api/reports/fund-flow?from_date=2025-04-01&to_date=2026-03-31
```

10.13 Cash / Bank Book
Route: `/reports/cash-bank-book`
```
GET /api/reports/cash-bank-book?from_date=2026-03-27&to_date=2026-03-27&ledger_id=1
```
Filter: Ledger (only show Cash-in-Hand + Bank Accounts group ledgers).

10.14 Day Book
Route: `/reports/day-book`
```
GET /api/reports/day-book?from_date=2026-03-27&to_date=2026-03-27
```

```
Shows all vouchers for the date.

---

## 11. MULTI-CURRENCY

**Route:** `/currencies`

#### List
```
GET /api/currencies
```
Table: Code, Name, Symbol, Exchange Rate (vs INR), Last Updated, Actions.

#### Add Currency Form

| Field | Input | Required | Key |
|---|---|---|---|
| Currency Code | text | Yes | `code` — ISO 4217 e.g. USD |
| Name | text | Yes | `name` |
| Symbol | text | Yes | `symbol` |
| Exchange Rate (vs INR) | number | Yes | `exchange_rate` |

```
POST /api/currencies
Body: { "code": "USD", "name": "US Dollar", "symbol": "$", "exchange_rate": 83.50 }
```

Update Rate
```
PATCH /api/currencies/{id}/rate
Body: { "exchange_rate": 84.25 }
```

Currency Converter Widget (inline on list page)
```
GET /api/currencies/convert?from=USD&to=INR&amount=1000
```

```

12. APPROVAL WORKFLOW

Route: `/approvals`

Two Tabs: All Requests | My Pending

```
GET /api/approvals?status=PENDING&entity_type=SALES_INVOICE    → All Requests
GET /api/approvals/pending                                      → Requests I need to act on
```

Table: Entity Type, Entity Ref, Requested By, Date Submitted, Remarks, Status, Actions.

Submit for Approval

> Place "Submit for Approval" button on Invoice/Voucher detail pages when status = DRAFT.

Entity Types: `VOUCHER` / `SALES_INVOICE` / `PURCHASE_INVOICE` / `EXPENSE`

```
POST /api/approvals
Body: { "entity_type": "SALES_INVOICE", "entity_id": 5, "remarks": "Please approve" }
```

Approve (show only if current user ≠ requestor)

```
POST /api/approvals/{id}/approve
Body: { "remarks": "Looks good, approved" }
```

Reject

```
POST /api/approvals/{id}/reject
Body: { "reason": "Amount exceeds budget" }
```

> **Important:** Backend returns 403 if you try to approve your own request. Show friendly message: "You cannot approve a request you submitted."

---

13. SETTINGS

Route prefix: `/settings/`

13.1 Company Settings

```
GET /api/settings/company    → display
PUT /api/settings/company    Body: { gstin, state_code, ... }
```

13.2 Voucher Types

```
GET /api/settings/voucher-types
```

Read-only list. 9 types: Payment, Receipt, Journal, Contra, Sales, Purchase, Credit Note, Debit Note, Stock Journal.

13.3 Warehouses

```
GET /api/settings/warehouses
POST /api/settings/warehouses     Body: { "name": "Delhi Warehouse", "location": "Okhla, Delhi" }
PUT /api/settings/warehouses/{id} Body: { "name": "Updated Name", "location": "New Location" }
```

---

14. MASTER DATA (Customers & Vendors)

Customers

Route: `/master/customers`

Create Customer Form

Field	Input	Required	Key
Name	text	Yes	`name`
GSTIN	text	No	`gstin`
Phone	text	No	`phone`
Email	email	No	`email`
Address	textarea	No	`address`
City	text	No	`city`
State	text	No	`state`
State Code	text	No	`state_code`
Opening Balance	number	No	`opening_balance`
Balance Type	radio	No	`balance_type` — DR (default) or CR
Credit Limit	number	No	`credit_limit`
Payment Terms (days)	number	No	`payment_terms`

```
POST /api/customers
GET /api/customers?page=1&limit=20&search=rajesh
PUT /api/customers/{id}
DELETE /api/customers/{id}
```

Vendors

Route: `/master/vendors`

Same form as Customer, `balance_type` defaults to CR.

```
POST /api/vendors
GET /api/vendors?page=1&limit=20&search=sharma
PUT /api/vendors/{id}
DELETE /api/vendors/{id}
```

---

15. AUTHENTICATION

Login Page
```
POST /api/auth/login
Body: { "email": "...", "password": "..." }
```
Store in localStorage: `accessToken`, `refreshToken`, `user.id`, `user.company_id`, `user.name`.

Register Flow (New Business)
1. `POST /api/onboarding/register-owner` — creates owner account
2. `POST /api/auth/login` — get token
3. `POST /api/onboarding/company` — create company + seed all master data

Get Profile (on app boot to restore session)
```
GET /api/auth/profile
```
Returns: `{ user, company, companies[], roles[] }`

Logout
```
POST /api/auth/logout
Body: { "refresh_token": "..." }
```
Clear localStorage, redirect to login.

Switch Company
```
POST /api/auth/switch-company
Body: { "company_id": 2 }
```
Replace `accessToken` in storage with new one from response.

---

16. Common UI Components

Searchable Select (Autocomplete)
For Items, Customers, Vendors, Ledgers — implement type-ahead:

````
1. User types → debounce 300ms
2. Call `GET /api/{endpoint}?search=<query>&limit=20`
3. Render options dropdown

### Status Badge Colors
```css
DRAFT / PENDING / OPEN      → yellow (#F59E0B)
POSTED / ACTIVE / CONFIRMED / COMPLETED / APPROVED → green (#10B981)
CANCELLED / REJECTED / OBSOLETE / TERMINATED → red (#EF4444)
PAID / CLEARED              → blue (#3B82F6)
PARTIALLY_PAID / IN_PROGRESS / HALF_DAY → orange (#F97316)
PRESENT                     → green
ABSENT                      → red
HALF_DAY                    → orange
LEAVE / HOLIDAY / WEEK_OFF  → gray (#6B7280)
```

### Error Handling Toast Messages
| `error_code` | Display |
|---|---|
| `VALIDATION_ERROR` | Show field-level errors from `errors[]` array |
| `DUPLICATE_ENTRY` | "{field} already exists" |
| `AUTHENTICATION_ERROR` | Redirect to /login |
| `AUTHORIZATION_ERROR` | "You don't have permission to do this" |
| `NOT_FOUND` | "Record not found" |
| `INTERNAL_ERROR` | "Something went wrong, please try again" |
| `FOREIGN_KEY_ERROR` | "This record is linked to other data and cannot be deleted" |

### Pagination Component
Always use `page` + `limit` query params.
Show: "Showing {(page-1)*limit + 1}-{min(page*limit, total)} of {total} records"
Previous / Next buttons. Disable Previous when page=1, Next when page=total_pages.

### Date Range Filter (reusable component)
Default values: From = start of current financial year, To = today.
Store in component state; pass as query params on fetch.

---

## API Quick Reference

| Module | Base API Path |
````

```
|---|---|
| Auth | `/api/auth` |
| Onboarding | `/api/onboarding` |
| Company | `/api/company` |
